EXPERIENCE

AYP Web Creations **– (Full stack Developer Freelancer) Cambridge, ON Feb 2020 - Present**

Amazing Pet Grooming **– (Graphic Designer / Web Developer)   Milton, ON 2016 - Present**

- Designed and developed compelling logos, flyers, and additional marketing materials.
- Designed a Full-stack-app to improve the way of handling clients and employees schedule
- Solved customer issues / IT related issues on a daily basis.

Modatek Systems **– (Material Handler)   Milton, ON   2015 – Jan 2020**

- Provided support for production team leaders/members throughout the plant using a forklift.
- Trained new workers in the Materials Department.
- Assisted team leaders with sorts and other tasks.

BUILT PROJECTS

- **My Pet Grooming App https://www.mypetgroomingapp.com/**
  Software as a Service (SaaS)
  This SaaS, provides a simple way for small businesses to manage their clients (humans, pets, and services), their appointments (including online booking and clients-personal-profile), and their employees (virtual punch clock), as well as detailed reports on employees working hours, commissions earned, etc.
  Users can choose among different membership packages to subscribe either monthly or yearly. It was built using Javascript, ReactJs (Class and Functional components), HTML, CSS, Context API, Apollo Client, MailGun, Bootstrap NodeJs, Express, PassportJs, JWT, MySql, Sequelize, GraphQL.

- **Pet Grooming Web Application https://www.amazingpetgrooming.ca**
  Full Management System for a Small business.
  This React Application was built for a Pet Grooming business. The admin of the page is able to add employees to the system, so they can login to the staff page based on roles, where they can manage the clients' database, add appointments to their own Calendars and adjust their working hours. Customers are also able to book appointments online. This Application solved several issues this business faced in the past and was designed, deployed, and maintained by me.

- **Printing-Memories https://www.printingmemories.com**
  Ecommerce web application
  This full-stack-app allows users to create products for sublimation, pay for them, and receive confirmation emails. It was created using React Js, NodeJs, Express, Stripe, Pure CSS, SASS.
